PROFESSIONAL SUMMARY

B.Tech CSE student at IIIT Kota (CGPA: 9.40) and ICPC 2025 Regionalist. LeetCode Knight, and full-stack (MERN) developer with hands-on experience building campus-scale web platforms and organizing competitive programming contests. Skilled in C++, Java, Node.js, and Express.

TECHNICAL SKILLS

Languages : C/C++, Java, Python, SQL, C#, JavaScript, HTML, JSON, CSS, Go
Frameworks : jQuery, React, Node.js, Express, Bootstrap, Echo, PostgreSQL, Redis
Tools : Postman, Git, SQL Server, Docker
Others : OS, Competitive Programming, DBMS, OOPS, CN
GenAI Tools & AI skills : ChatGPT, Gemini, GitHub Copilot, Cursor, Antigravity, Prompt Engineering, LLM Tool-Calling & Agent Tool-Use

EDUCATION

Degree	Institute/Board	CGPA/Percentage	Year
B.Tech CSE	Indian Institute of Information Technology, Kota	9.38 (Till 6th Sem)	2023–2027
Senior Secondary	Central Board of Secondary Education (CBSE)	88%	2023
Secondary	Central Board of Secondary Education (CBSE)	95.8%	2021

PROJECTS

Kestrel: High-Throughput Webhook Delivery Engine | GitHub | Go (Echo), PostgreSQL, Redis, React, TypeScript June 2026

- Engineered a highly concurrent webhook delivery platform using Go and PostgreSQL, successfully processing a **2-million-event burst** with **zero dropped payloads** while sustaining **1,652 webhook deliveries/sec** end-to-end.
- Optimized API ingestion to **3,846 requests/sec** by replacing synchronous database triggers with an asynchronous Go channel-based in-memory aggregator, significantly reducing database write overhead and CPU utilization.
- Architected resilient delivery workflows featuring Redis-backed distributed circuit breakers, decorrelated exponential backoff, Dead Letter Queues (DLQ), and HTTP timeout-based retries for fault-tolerant webhook delivery.
- Designed a **32-poller concurrent architecture** using PostgreSQL `FOR UPDATE SKIP LOCKED` and batched dequeuing for high-throughput job processing, monitored through a React observability dashboard with Prometheus and Grafana.

Skill Swap Platform | GitHub | React (Vite), Tailwind CSS, Axios, Node.js, Express.js, MongoDB, JWT, bcryptjs July 2025

- Developed a full-stack skill-swapping platform featuring dynamic user profiles, secure JWT-based authentication, and bcryptjs password hashing.
- Implemented core features: multi-skill swapping, skill marketplace, request tracking (Pending/Accepted/Rejected/Completed), and advanced search/filter functionality.
- Created an admin dashboard with login via environment variables to manage users (ban/unban/delete), moderate content, and monitor swap logs.

ACHIEVEMENTS

- ICPC 2025 Regionalist** (Kanpur).
- Expert (1619)** in Codeforces, **4 star (1834)** in Codeforces, **Knight (2015)** in Leetcode.
- Semi-finalist** at Flipkart Grid 7.0 competition.
- Finalist** at Odoo Hackathon 2025.
- Grand Finalist** at HackTheChain 3.0 Hackathon.
- Microsoft AI Fluency – Trophy (2026)** – Completed Microsoft’s official AI Fluency learning path covering GenAI fundamentals, prompt engineering, LLM workflows, and responsible AI practices.

LEADERSHIP & INVOLVEMENT

Algorithmus – Core Member | Competitive Programming Club, IIIT Kota September 2024 – Present

- Organized 3 competitive programming contests, including *Endeavour 3.0* and *Endeavour 4.0*, boosting participation in DSA and CP by 35%.
- Collaborated with peers to curate problem sets, mentor juniors, and promote consistent practice culture across batches.
